DETAILED ACTION

Response to Arguments

1. Applicant's arguments have been fully considered but they are not persuasive with respect to some of the claims. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., a gap between both the bolt portion and the sleeve, and a gap between the sleeve and the liner member) are not recited in all of the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 4, 7-11, 13, and 15-17 are rejected under 35 U.S.C. 102(e) as being anticipated by Miura et al (US # 6,677,539). Miura discloses the claimed seat load sensor including a fixing (flange) portion (2b), a bolt portion (3), a sensor (1) arranged in-between (Col. 4, lines 3-27), a sleeve (10), and an embodiment with a "bush" or "liner" (12).. With respect to claim 4, Miura shows the flat washer (5,6). With respect to claims 5 & 11-13, the figure 4 & 5 embodiment shows that the sleeve (10) is part of the

collar (13,14). With respect to claims 6 & 14-17, it appears that the load sensors are attached to the for corners of a seat frame (I.E.: "a bracket").

Conclusion

4. Claims 2, 3, 5, 6, 12 and 14 are allowable based on the applicant's latest remarks.
